

TIENET Teacher Viewing Of Assessment Data

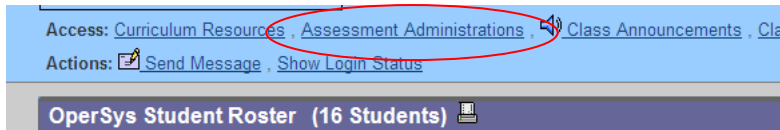

Viewing Assessment Results

(These steps will help a classroom teacher to view NECAP data for 2007-2008. Please note that security settings in TIENet allow teachers to view assessment data for only their present student rosters.)

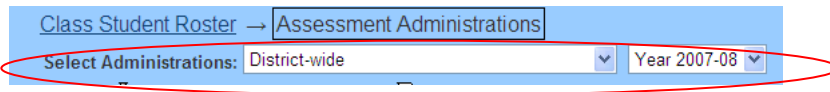

1. Click on one of the classes under **Your Classes** on your TIENet Homepage.

2. Select Assessments Administrations from the Access menu.

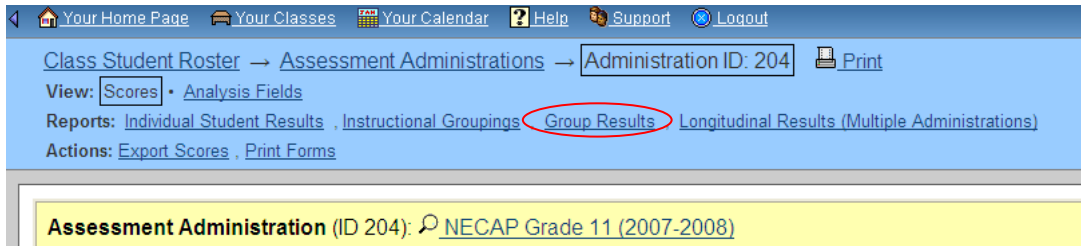

3. To view NECAP data – Select District-wide Administrations and the 2007-2008 School Year from the drop down menus at the top of the page.

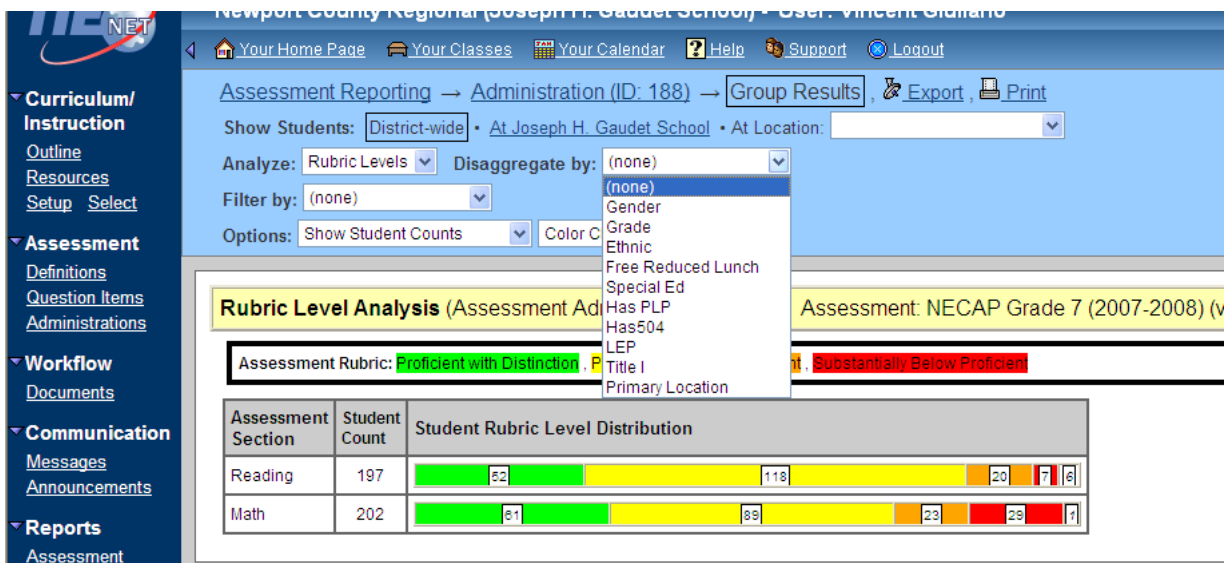

4. Once you select an assessment you will see the list of students that took the assessment and a menu of choices at the top.

- You can run reports based upon demographic data (IEP, 504, PLP, gender, ethnicity, socioeconomic status, etc.) Select **Group Results** and then select the Disaggregate by drop down.

- The report results are interactive. Please click on an area of the bar to drill down and view the student names. You can view additional data on each student by clicking on their name and selecting the student's score history link.

FREQUENTLY ASKED QUESTION:

How can I view the score history of a student?

While viewing a roster of your students in TIENet you can click on the magnifying glass next to a student's name. This will bring you to the student's profile. Select the SCORE HISTORY link.
